Lui's Collection – a brief introduction and history

The Lui's Collection has been held in high regard for almost 25 years with Interior Designers, Hoteliers, high class Lighting, Interiors and Furniture retailers around the world. Elstead Lighting acquired this specialist base and shade company in September 2009 from the range originator Isabel Lui and have continued to develop many new models for 2012. These include iconic oriental shapes and patterns adding to the existing Orient range, and many new contemporary colour ceramic models for the Mode range.

Elstead LIGHTING

- a brief introduction and history

Elstead Lighting is based in Alton, Hampshire and has been established as metal workers and engineers since 1967. The company is well known for the design and quality of its products, which it supplies to both trade and retail buyers. Its origins date back to 1686 when it was founded as the village forge in Elstead, Surrey and served the local townsfolk as the village blacksmith. Elstead moved to Alton in 1971.

Today many fittings are still designed, manufactured and assembled at its Alton factory, which is capable of producing such a diversity of finishes and styles – ranging from lamps inspired by 18th century architectural details to more contemporary influences. Bespoke products for special contract work can be offered where required.

Elsteads' showroom, which is now under redevelopment for launch in the Autumn 2012, will offer one of the largest displays of decorative and functional lighting in England. There will be almost 10,000 square feet of modern and traditional styles including; beautiful chandeliers, wall lights, table lamps, bathroom lights and a huge range of exterior lighting.

PLEASE NOTE: Shades are sold separately from base fittings to maximise choice options. Please remember to order both base and shade if a complete fitting is required.
